Abstract

The accuracy its very important when does translation activity, in this modern life many people using the Google Translate to help them translating a word, phrase, or a sentence, but sometimes it can be meaningless or not accurate. Therefore, the purpose of this study is to evaluate how accurately Google Translate has translated English verb tenses into Indonesian. This study used a qualitative method to reasearch the accuracy. The data's primary source was a translation that was produced by Google. The source of the data from the subtitles of The Boss Baby. There were numerous methods used to get the data, including: 1).Downloaded the Movie of The Boss Baby from the internet and, 2). The researcher selected 30 data of verb phrases from subtitle of The Boss Baby and make it in the table. To analyze the data, the techniques were : The raw data will be translated from Source Language (English) to Target Language (Indonesian) by Google Translate and then, The researcher analyzed the data by using Moorkens based on Nababan (2018:59), There were three types of translation: accurate, less accurate, and inaccurate. The results of this research showed that out of 30 pieces of data, 25 had accurate translations, 3 had less accurate translations, and 2 had inaccurate translations. The researcher reached the conclusion that Google Translate's translation of English verb tenses was correct.

Keyword: *Translation, Google Translate, Accuracy, Verb Phrase*

Abstrak

Keakuratan sangat penting ketika melakukan kegiatan penerjemahan, dalam kehidupan modern banyak orang menggunakan Google Translate untuk membantu mereka menerjemahkan suatu kata, frase atau kalimat, namun terkadang bisa jadi tidak bermakna atau tidak akurat. Oleh karena itu, tujuan dari penelitian ini adalah untuk mengevaluasi seberapa akurat Google Translate menerjemahkan verb

tense bahasa Inggris ke dalam bahasa Indonesia. Penelitian ini menggunakan metode kualitatif untuk meneliti keakuratannya. Sumber utama data adalah terjemahan yang diproduksi oleh Google. Sumber datanya dari subtitle The Boss Baby. Ada banyak metode yang digunakan untuk mendapatkan data, antara lain: 1). Mengunduh Film The Boss Baby dari internet dan, 2). Peneliti memilih 30 data frase verba dari subtitle The Boss Baby dan memasukkannya ke dalam tabel. Untuk menganalisis data, tekniknya adalah: Data mentah akan diterjemahkan dari Bahasa Sumber (Inggris) ke Bahasa Sasaran (Bahasa Indonesia) oleh Google Translate dan kemudian, Peneliti menganalisis data dengan menggunakan Moorkens berdasarkan Nababan (2018:59), Ada tiga jenis terjemahan: akurat, kurang akurat, dan tidak akurat. Hasil penelitian menunjukkan bahwa dari 30 data, 25 terjemahan akurat, 3 terjemahan kurang akurat, dan 2 terjemahan tidak akurat. Peneliti sampai pada kesimpulan bahwa terjemahan Google Translate untuk tense kata kerja bahasa Inggris adalah benar.

Kata Kunci: *Terjemahan, Google Terjemahan, Akurasi, Frasa Kata Kerja*

INTRODUCTION

Language is essential in human life since people would be unable to operate without it. Language is necessary in today's world to communicate with people from different nations. In order to prepare Indonesia for globalization, English is the first foreign language taught in Indonesia from junior high school to university level (Simaremare et al., 2021). Cross-language communication in the form of translation happens in modern life and is predicted to grow in importance. There is a strong propensity for universalization in all facets of human life in the age of globalization (Lin et al., 2022). Many issues must be addressed so that our country is not left behind by new global developments that can adapt to the countries of the globe.

Many individuals engage in translation activities when studying English in general. Translation is the process of transmitting a message from one language into another so that readers who understand the TL may understand it (target language). Translation is the process of transferring meaning from the source language (SL) to the target language (TL), according to Newmark (2018), and any technique of transferring meaning from the source language (SL) to the target language (TL) contains the challenging problem of translation. This conclusion was reached due to the possibility that a shoddy translation technique might result in the target language misinterpreting the meaning of the message in the source in the source language. In general, the goal of translation is to imitate diverse genres of writing, such as literary, scientific, and philosophical literature (Mirza Suzani, 2019).

Translation is a difficult procedure since it involves the transfer of thoughts and ideas from one language to another. Understanding the cultures of both languages, as well as the

content being translated and the target audience, is critical for producing a competent translation (Khair, 2022). A translator must be fluent in both languages as well as their culture in order to prevent literal translation, misunderstandings, and blunders. Individuals may now share any point of view on the globe thanks to the availability of translation services. People may trade information, knowledge, ideas, and a wide range of other things (Sakamoto, 2021). However, some people have difficulty comprehending and interpreting the SL (source language). There are significant variations between the source and target languages, including as structure, culture, and style. As a result, translation is highly important for persons who do not understand SL well and require assistance in translating it into the TL.

Because many of the technicians still utilized the native language of the writer who wanted to be understood, translation became something familiar to those who knew the language. This sparked the notion of translating the text to better comprehend it. Adults today employ instantaneous language to make their time more efficient. There are various translation apps that may assist us in translating words, phrases, clauses, and sentences. Google Translate is one of the most widely used technologies nowadays. Google Translate is a software application that was launched in 2006 (Rajagukguk, 2019). It gives a large number of languages from various countries that will let us automatically translate words, phrases, clauses, sentences, and text from the SL (source language) to the TL (target language). This translation engine comes in handy when translating from a foreign language into Indonesian. As a consequence, it helps readers understand the meaning of the translation. Translation not only change a text from source language to target language, when transferring the message to target language it is not a trivial matter to produce a good translation. So before we pass the message, we have to understand the message accurately (Rahmawati et al., 2022).

Accuracy must be taken into consider when translating, and the user or reader must be able to understand the final result. If the outcomes of the translation do not change the intended meaning or message, the translation is considered correct. Google Translate does not always translate correctly, such as when translating a verb phrase. Although a phrase is a combination of two or more words, understanding the components of a verb phrase may seem and sound complicated (Somani et al., 2022).

As a consequence, a verb phrase is defined as a group of words that can serve as a verb in a sentence. Silalahi (2018), noted verb phrase is a major verb that comprises multiple auxiliary verbs or helping verbs that help create the grammatical sentence and provide meaning. Many individuals today use Google Translate to help them translate languages. The

results of language translation are not always predictable, yet. In the target text, the modal verb will notice is not translated. The word 'menyadari' is incorrect. Verb phrases that translation by Google Translate is less accurate. The word will notice in source text must be translated akan menyadari in the target language.

Google Translate does not always provide us to understand every translation word for word or sentence for sentence. It's far from accurate since Google Translate only translates words for words without creating proper sentences based on Indonesian syntax. The researchers identified the inaccurate translation error. In terms of stage, Google Translate makes errors when translating from English to Indonesian. A scientific deviation from the target language's standard operating procedure is mistakes (Sandra, 2018). As a phenomena, this is. For it, one must comprehend the degree of translation correctness. The researchers made great effort to conduct this research and produce accurate results (Napu, 2019).

It is not always simple to translate from English to Indonesian since there are differences in the two languages' syntax, verb tenses, plural forms, and passive vs. active tenses. The researchers concur that this study may be helpful to readers who use Google Translate because understanding translation is crucial and that using the tool infrequently won't always help us understand what is being translated from English into Indonesian (Nadirah et al., 2019). Because English is our second language outside of our country and because it is a universal language, Google Translate is one of our essential tools in daily life (Fitria, 2018). Again, it might be said that translating is difficult since, in the researcher's experience using Google Translate, the researcher found that not always the target text accurately conveyed the meaning of the source text. Researchers are interested in how well Google Translate can translate verb phrases. A study named "The Accuracy English Verb Phrase Translation into Indonesian by Using Google Translate" is what the researcher wishes to carry out.

RESEARCH METHOD

The researcher used qualitative research in this research. Ary, et al. (in Silalahi et al., 2018) claim that qualitative research aimed to comprehend a phenomena by concentrating on the whole picture rather than dissecting it into variables and description of comprehended rather than a numerical examination of data. Additionally, according to Creswell (in Uktolseja et al., 2019), qualitative research aims to study and comprehend the significance that individuals or groups attribute to social or human problems. It seeks to aid in our understanding of the social environment in which we lived and the reasons behind why things are the way they are (Hutauruk & Puspita, 2020). In light of the foregoing justification, it may be concluded that

qualitative research entails understanding social phenomena based on descriptions rather than analysis of numerical data.

The subtitle of the movie of the boss baby is to obtain the data. The researcher selected this subtitle because, as far as the researcher observed, none were connected with the particular verb phrase. As a result, the researcher examined the verb phrase data from the Movie of the Boss Baby subtitle.

The researcher used several techniques to collected the data

1. Before analyzed the data, the researcher firstly downloaded the data subtitle Movie of the Boss Baby from the internet.
2. After downloaded the data, the researcher would selected the data the subtitle of Movie The Boss Baby as many 30 data, which the data is verb phrase.
3. After the researcher finish selected the data, the data was made in the table by the researcher

RESULT AND DISCUSSION

In this part, the researcher analyzed how The Boss Baby's verb phrases were translated from English into Indonesia. The researcher analyzed how accurately a word phrase was translated into Indonesia. The researcher used information from the movie subtitle for The Boss Baby to analyze the translation's correctness. The researcher found out that the movie The Boss Baby's subtitle contains 30 data verb phrases, which can be seen in table Data phrase from The Boss Baby movie.

Table 1. Data Verb Phrases from the movie The Boss Baby.

No	Data Verb Phrase in Movie of The Boss Baby
1	The baby was delivered in a taxi
2	You should go
3	He wears a suit
4	He was yelling at people
5	You were saying
6	He's taking over the whole house
7	You're gonna love him
8	You were saying
9	You would never ask your parents
10	We could share

11	We could buy a bouncy house
12	But I'll tell you who is
13	We will grow old together
14	We're gonna launch it
15	And you're going to help me
16	So have you learned anything from them ?
17	You've been asking for this
18	He can talk
19	We are very disappointed in you
20	You're gonna stay in this house
21	You were only waiting
22	I could reach my magical shank
23	We have to talk
24	You're just trying to steal them from me
25	Take this, it'll explain everything
26	They're stealing all our love
27	I will get a promotion
28	You're coming back here?
29	I will help you
30	You are gonna write a book report ?

Data Analysis

In this part, the researcher analyzed a selection of the tenses of the verbs from the movie *The Boss Baby's* subtitle. Using Google Translate, the researcher first translated the data before using Moorkens (2018) technique to evaluate it. The researcher then created a table with a total number of translation categories and made a conclusion.

Table 2. Data translation by using Google Translate

No	Data from Source Text (English)	Target Text (Indonesian) by GT
1	The baby was delivered in a taxi	Bayi itu dilahirkan dengan taksi
2	You should go	Kamu sebaiknya pergi
3	He wears a suit	Dia memakai jas
4	He was yelling at people	Dia berteriak pada orang-orang
5	You were saying	Anda mengatakan

6	He's taking over the whole house	Dia mengambil alih seluruh rumah
7	You're gonna love him	Anda akan mencintainya
8	You should buy some cake	Kau harus membeli sebuah kue
9	You would never ask your parents	Anda tidak akan pernah bertanya kepada orang tua Anda
10	We could share	Kita bisa berbagi
11	We could buy a bouncy house	Kita bisa membeli sebuah rumah goyang
12	But I'll tell you who is	Tapi saya akan memberi tahu Anda siapa itu
13	We will grow old together	Kita akan menjadi tua bersama
14	We're gonna launch it	Kami akan meluncurkannya
15	And you're going to help me	Dan Anda akan pergi untuk membantuku
16	So have you learned anything from them ?	Jadi, apakah Anda belajar sesuatu dari mereka?
17	You've been asking for this	Anda telah meminta ini
18	He can talk	Dia bisa bicara
19	We are very disappointed in you	Kami sangat kecewa padamu
20	You're gonna stay in this house	Anda akan tinggal di rumah ini
21	You were only waiting	Anda hanya menunggu
22	I could reach my magical shank	Saya bisa mencapai betis ajaib saya
23	We have to talk	Kita harus bicara
24	You're just trying to steal them from me	Anda hanya mencoba mencurinya dari saya
25	Take this, it'll explain everything	Ambil ini, itu akan menjelaskan semuanya
26	They're stealing all our love	Mereka mencuri semua cinta kita
27	I will get a promotion	Saya akan mendapatkan promosi
28	You're coming back here?	Anda kembali ke sini?
29	I will help you	Saya akan membantu Anda
30	You are gonna write a book report ?	Anda akan menulis laporan buku?

The researcher determined the accuracy based on the standard accuracy using the chart from Moorkens et al. (in Aharoni et al., 2019), which is based on there are Data (1)

SL : The baby *was delivered* in a taxi

TL : Bayi itu *dilahirkan* dengan taksi

In the target language, the modal verb '*was*' is not translated or deletion. The word 'dilahirkan' is incorrect. Verb phrases that translation by google translate is less accurate. The word "*was delivered*" in source language must be translated "*sudah diantarkan*" in the target language.

Data (2)

SL : You *should go*

TL : Kamu *sebaiknya pergi*

The sentence in the source language its translated 'well' to the target language. The meaning from the source language is clear and easy to understand. Verb phrases that translation by using google translate is accurate.

Data (3)

SL : He *wears* a suit

TL : Dia *memakai* jas

In the source language, the word '*wears*' its transferred clear become '*memakai*' to the target language . The verb phrase translation by using google translate is accurate, there are no distortions in meaning and easy to understanding.

Data (4)

SL : He *was yelling* at people

TL : Dia *berteriak pada* orang-orang

In the target language, the modal verb '*was*' is not translated or deletion. The word '*berteriak*' is incorrect. The word "*was yelling*" in source language must be translated "*sudah berteriak*" in the target language. The verb phrase that translation by using google translate is less accurate.

Data (5)

SL : You *were saying*

TL : Anda *katakan*

In the target language, the modal verb '*were*' is not translated or deletion. The word '*katakan*' is incorrect. Verb phrases that translation by google translate is inaccurate. The word "*were saying*" in source language must be translated *sedang bicarakan* in the target language.

Research Findings

Based on the findings of the data analysis, the researcher created a table of total number translation categories. The table reveals that out of 30 data, 25 were accurate, 3 were less

accurate, and 2 were inaccurate. From the 30 results above, accurately translation was the most similar. This showed that the Indonesian rendering of an English verb phrase by Google Translate was accurate.

Table 3. Total number translation category by using Google Translate.

No	Translation Category	Total
1	Accurate	25
2	Less Accurate	3
3	Inaccurate	2
	TOTAL	30

From the table of total number translation category by using Google Translate, the researcher make the conclusion based on the researcher preception and founded there are 25 of data that categorized accurate, its means the data was translated correctly and the meaning its clearly, then the researcher founded there are 3 data that categorized less accurate, its means the data have a ambiguity meaning, and the meaning from the source language to target language its not translated well and have the distrotion meaning, and the last the researcher founded there are 2 data that categorized not accurate, its means the data that translated by using google translate its not correct, and meaning in the target language its error or wrong. The founded was also included in the chart in order to provide a more detailed description.

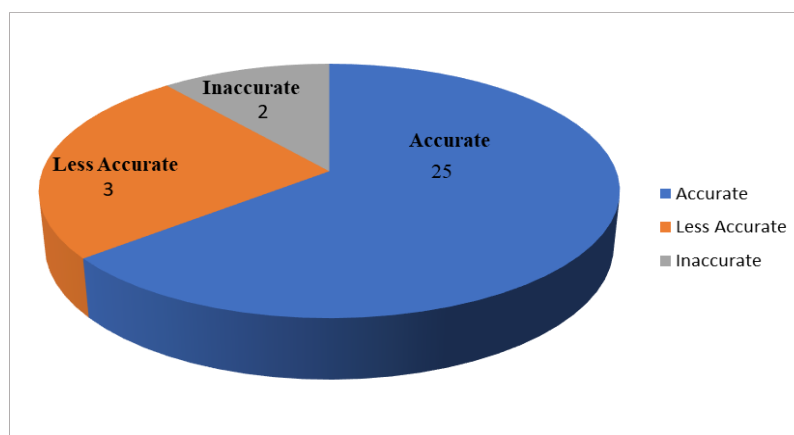

Figure 1. Total Accuracy Transalction by using Google Translate

Discussion

The analysis above produced a result that accurately conveyed the data. Using references from Nababan and Moorkens, the following may be seen, such as :

Accurate Translation

SL : *I will help you*

TL : Saya *akan membantu* Anda

Based on a source, the language above had been translated accurately. Nabababan also referred to this translation as accurate because it accurately conveys the meaning of the Source Language in the Target Language. In this context, accuracy refers to the correct translation of words, phrases, clauses, and sentences from the source language into the target language. The translation is understandable to the assessor, so no reworking is required. In most situations, the translation from the source language to the target language is accurate (Popel et al., 2020). There are no significance modifications. The main idea is obvious easy to understand, and constant. Words and sentences that have been translated must be free of errors in order to be accurate (Arivazhagan et al., 2019).

Less Accurate Translation

SL : The baby *was delivered* in a taxi

TL : Bayi itu *dilahirkan* dengan taksi

It considered that the rendering of the text above was not as accurate. The implications of phrases were less accurate. In the target language, there were still mistakes in meaning ambiguity and omission.

Inaccurate Translation

SL : You've *been asking* for this

TL : Anda telah meminta ini

The message is completely undermined. When words, phrases, clauses, or sentences from the source language are not accurately transformed into the target language, mistranslation, omission, and inaccurate translation allow occur.

As was said before, translation is essential to human existence. The translator must work very hard to communicate meaning since they understand how important it is (Kusmaryani et al., 2019). Because of this, the translator may need to add information that wasn't in the source for adjustment, eliminate information, or even make mistakes in the analysis of the source language during the transfer process, leading to a word with a different meaning. This makes translation a challenging undertaking, and the researcher must assess the translation's correctness.

The results from this research in terms of the accuracy of Google Translate's translations are accurate (Andriani et al., 2021). defines accuracy as the absence of errors, truth, and precision. In terms of translation, the portion that is transferred during translation is the accuracy of the content or message. According to the findings of this study, Google Translate

can be very useful or helpful for many people who do not comprehend how to translate words, phrases, clauses, or sentences (Muamaroh et al., 2020).

As far as we know, Google Translate and other machine translation programs depend more on statistics than on rules. In the hundreds of millions of documents that have already been translated by humans, they search for patterns. Because language is founded on rules, a statistics-based translator like Google Translate will have trouble translating complicated grammatical concepts (Murtisari et al., 2019). There are some words that the machine cannot translate properly or could even translate incorrectly since Bahasa Indonesia and English have different grammatical rules. As a result, in order to obtain a more accurate translation than using the Google Translate translation application, everyone who wants to translate something from a different language must also use translation studies that have already been completed or methods and techniques in translating activities.

CONCLUSION

The researcher found out that there are three levels of translation accuracy in the film *The Boss Baby*: Accurate, Less Accurate, and Inaccurate after examining the data from the previous chapter. which consists of 30 data verbs that were found in the film *The Boss Baby* and which can be seen below: 25 data verb phrases are thought to be translated accurately, 3 data verb phrases are thought to be translated less accurately, and 2 data verb phrases are thought to be translated incorrectly. Therefore, the researcher draws the conclusion that this research "*The Accuracy English Verb Phrases Translation into Indonesian by using Google Translate*" is an accurate translation and that all users of Google Translate could benefit from using this application based on the data analysis that focuses on the research problem. However, there were still a few mistakes in the verb phrase translation.
